

What's Cooking Report

School/Department: Aviara Oaks Elementary
Administrator: Kimberly Ann Huesing

Period: Week of 2/19/10
Enrollment: 776

EVERY STUDENT MAKES SIGNIFICANT YEARLY PROGRESS TOWARD ACHIEVING APPROPRIATE AND MEANINGFUL ACADEMIC AND ESSENTIAL LIFE SKILLS & STANDARDS.

Strategies:

Every student is taught through a standards-aligned curriculum.

- Mrs. Severino's Kindergarten class used the "Late Owl" time for whole-group math instruction using the SMART Board for patterning while Mrs. Fearn's "Late Owls" were participating in Language Arts centers. The small group of students working with Mrs. Fearn were practicing high frequency decodable words. Kindergarten is an exciting place!

2nd Grade students in Mrs. Weatherall's class celebrated The Chinese New Year by using their brand new calligraphy sets from Amanda's mom and writing "Gung Hay Fat Choy" in Chinese characters. These 2nd graders learned that this year is the year of the Tiger which means people born during this lunar year will be independent and loving.

Every employee achieves specific performance and professional development goals supporting student learning and organizational effectiveness.

Principal Huesing attended the Superintendent's Task Force conference on Wednesday morning with all of the principals of Carlsbad and Dr. Roach's leadership team. The task force focused on serving and succeeding in the education of English Language Development students. The good news from AOE is that eleven of our EL students earned "Reclassification" this year by meeting grade level proficiency standards as well as meeting the requirement on the CST taken last May.

We create a safe, trustful environment in which resources are optimized and communications are respectful and informative.

AOE's Safety Committee met last Friday to review the assignments of the Emergency Plan. After the assignments were reviewed and updated, the team discussed the need for teachers to stock their own emergency back packs with food, water, and snacks for the teachers as well as emergency medical requirements for their students. While the emergency boxes and buckets in each classroom contain provisions for students, the committee noted the need for teachers to also prepare for themselves.
